Mr Charles L. A. Terrini
Public Service Commission

Docket # 2007-41-W

Dear Mr Terrini:

You are aware of the ongoing water issues in the Ashley Oaks Phase II development. The wells are obviously not enough to support the housing development, particularly since it appears new houses have been added to the already overtaxed existing system and this issue is becoming critical.

I understand that there is an ongoing personal issue between Mr. Mike Shelley and Mrs Bobbie Young over the ownership, transference and/or use of the well on Mrs Young's property. **This issue needs to be kept totally separate from the public water system coming to Ashley Oaks and should be dealt with accordingly.**

Whatever needs to be done to get the system to Ashley Oaks should be done. I urge you to proceed forward with the installation of the water. As early as two months ago the water pressure was ridiculously low and this situation just cannot continue. The potential health issues which may arise from this continuing drop in water supply could have serious impact.

Yours sincerely,

Sandra J. York, MSN, BS, RN
William E. York, PsyD, LISW, MAC
